

ASSIGNMENT 3: GIT & R

Use tables of 'Sakila' schema which were used during SQL lectures to complete following tasks.
Use Git and *data.table* package of R instead

1. Write a query to display all films that have a rating of PG and a rental duration greater than 5 days. [10 Marks]
2. Write a query to display the average rental rate of films, grouped by their rating. [10 Marks]
3. Write a query to count the total number of films in each language. [10 Marks]
4. List the customers' names and the store they belong to. [10 Marks]
5. Display the payment amount, payment date, and the staff member who processed each payment. [10 Marks]
6. Find the films that are not rented. [10 Marks]
7. Plot any graph of your choice. [10 Marks]
8. Use of Git in the entire assignment. [30 Marks]
